Hypertensive Emergencies - ACCP

Because propagation of the aortic dissection is related to shear stress (a principle related to blood flow velocity and rate), the treatment goal for aortic dissection is 2-fold: blood pressure and heart rate control (Hiratzka 2010; Papaioannou 2005). The goal heart rate during acute management of aortic dissection is less than 60 beats/minute

COW'S EYE dissection - Exploratorium

COW'S EYE dissection page 7 Under the retina, the back of the eye is covered with shiny, blue-green stuff. This is the tapetum. It reflects light from the back of the eye. Have you ever seen a cat's eyes shining in the headlights of a car? Cats, like cows, have a tapetum. A cat's eye

seems to glow because the cat's tapetum is ...
