FIDIC - A Guide for Practitioners Axel-Volkmar Jaeger 2009-11-11 In 1999, a suite of three new conditions of contract was published by FIDIC, following the basic structure and wording harmonised and updated around the previous FIDIC Design-Build and Turnkey Contract (the 1992 "Orange Book"). These conditions, known as the "FIDIC rainbow, were the Conditions of C-tract for: 1 Construction, the so-called Red Book, for works designed by the Employer 1 Plant and Design-Build, the so-called Yellow Book, for works designed by the Contractor 1 EPC/Turnkey Projects, the so-called Silver Book, for works designed by the Contractor The 1rst is intended for construction works where the Employer is responsible for the design, as for per the previous so-called Red Book 4th Edition (1987), with an important role for the Engineer. The other two conditions of contract are intended for situations when the Contractor is responsible for the design. The Plant and Design-Build Contract has the traditional Engineer while the EPC/Turnkey Contract has a two-party arran- ment, generally with an Employer's Representative as one of the parties.

A Practical Guide to Successful Construction Projects Arent van Wassenae 2017-04-21 Written by experienced and innovative projects lawyer Arent van Wassenae, this book explains what the critical success factors are for construction projects to be completed on time, within everyone's budget, to the right quality, with all stakeholders satisfied and without disputes. In so doing, van Wassenae discusses how such projects could be structured, tendered for, executed and completed, and what legal and non-legal mechanisms are available to achieve success in construction projects. Using examples of real projects, A Practical Guide to Successful Construction Projects provides tools for those in leading and managerial positions within the construction industry to change -- where necessary - their usual operational methods into methods which are aimed at achieving project success.

Construction Accident Law Marc M. Schneier 1999 Twenty years ago, there were 2500 lawyers in China, basically no legal system, and law schools and law libraries had either been closed or destroyed. It was one of the poorest countries in the world with an adult literacy rate of one-third. Today, illiteracy has dropped to below 10 per cent, consumption has more than doubled, and China has exploded as a major economic force in the global community, with the USA alone investing billions of dollars, aside from pursuing an increasing number of untapped markets. Now with more than 100,000 lawyers and mandated Rule of Law, China has enacted a multitude of new laws, regulations, and orders that must be understood if one wants to do any kind of foreign investment or trade in that country. This work is a guide to the complex laws of China. It opens with a survey of the historical development of China's contemporary legal system, and provides a summary of Chinese legislative and regulatory institutions and their functions. It also gives an overview of the judiciary and the many forces affecting China's evolving legal system.

Information follows a standard format, offering quick comparisons of how different jurisdictions treat the same issue. Topics include licensing and regulation; mechanic's liens; financing; consumer protection; ADR; environmental matters; and statutory and case law governing contracting practices.

Risk and Insurance in Construction Nael G. Bunn1 2003-09-02 Those who involved in construction have to cope with so much learning in their own discipline that they shun further involvement in subjects such as insurance and law which in themselves are so deeply and intensely complex. However, insurance and law are interwoven in the basic procedures used in the construction industry for undertaking work, be they design, construction, supervision or operation, or any combination of them. This thoroughly revised edition of Nael Bunn's successful book, formerly called Insurance in Construction, provides information on risk, construction law and construction insurance for those involved with all aspects of construction. The chapters on risk have been expanded to include recent developments in the area and provide further examples of events which could occur on what can be viewed as the most risky human work activity, namely construction. New chapters are also added to deal with the insurance clauses of the many new standard forms of contract published in recent years, including FIDIC's new suite of contracts published in September 1999, ICE's seventh edition of the civil engineering standard form of contract, and ICE's second edition of the design/build form.

A Guide to Leading and Managing Indiana School Facilities Tom Dykiel 2009-08 When school buildings are aging, a decision must be made as to whether to continue to maintain the existing building, renovate building, or build new. Very seldom is extending the existing buildings life over building a new building. If renovation costs exceed 50% of the cost of new construction, it is better to build instead of renovating. The taxpayers in your community will have much to say on whether to renovate or build new. Much emphasis should be given to taxpayer input before the school board makes a final decision. School administrators are responsible to the community for maintaining school buildings and they owe an explanation to the community of what has been done to protect existing school buildings. This book is developed to help aspiring teachers who want to become principals, business managers or superintendents, that existing buildings need to be properly maintained and functional and can continue to serve the public for many years to come.

The Savvy Businessperson's Guide to Property & Casualty Insurance Karin A. Fleischhaker 2008 "Gitty Up" shouted the driver, as he encouraged the laboring horses to pull the ladened "prairie schooner" faster westward across the prairie. In the "prairie schooners" the people were excited and anxious to reach the vast prairie of Nebraska. They wanted to rush to the land, select their free land, and build their homes. Among the settlers on the Nebraska plains were the Author's parents. In this book the reader has a glimpse of their simple home, the care of the livestock on the farm, the planting and harvesting of the crops, the brutal weather, and the challenges of isolation. Every family depended on their horses for survival. Man power combined with horse power with determination resulted in permanent settlements. When tractors began to emerge for farming, then horses retired from field work. Whoa!

Research Handbook on International Insurance Law and Regulation Julian Burling 2012 'Global insurance and its rapidly evolving law and regulation demands international research. To this aim, the Handbook offers a truly international collection of essays. Highly renowned experts analyze the key topics currently under international discussion and development. While representing a diversity of national jurisdictions, the focus lies on the largest insurance jurisdictions (USA, UK and Germany) but newly important jurisdictions like Brazil and China are considered as well a most valuable and important contribution to international insurance law literature.' Manfred Wandt, Director of the Insurance Law Institute, Goethe-University Frankfurt, Germany 'This Research Handbook is published at an opportune time. A global review of insurance law and regulation is underway. Much reform happens locally with little reference to developments elsewhere and this Research Handbook brings the strands together. It is a comprehensive review by distinguished authors from different backgrounds including both leading academics and practitioners. They consider the definitions of insurance, its economic underpinnings, comparative law and regulations, actual and proposed reforms, the effects on underwriting and claims and how insurance is studied and taught. Good laws and regulation benefit the market and its customers. Bad laws and regulation do the opposite. This book is required reading for all involved in the reform process.' David Hertzell, Law Commissioner 'Globalisation has had no greater impact in the commercial world than on insurance, the law which governs it and the risks it seeks to address. Those who inspired this publication and the contributing authors, are to be thanked for providing such a necessary and useful reference source. It covers so much of what insurance professionals need to be aware of in the insurance/law world of the twenty first century.' Michael Gill, President of the International Insurance Law Association Given its economic importance, insurance is a field that has been underserved as an area of academic study. This detailed book provides much needed coverage of insurance law and regulation in its international context. Produced in association with Lloyd's, it draws on the expertise both of academics and practising lawyers. Containing 30 comprehensive chapters, it provides in-depth studies on key areas, such as the role of international organisations, the judicial interpretation of insurance contract clauses and transnational regulatory recognition. It also provides thorough introductions to important jurisdictions, including the EU, US and Japan as well as focusing on newly emerging economies such as China and Brazil. Specialist topics covered include regulation by and of Lloyd's, the tort of bad faith in the US, microinsurance and takaful insurance. This well-documented resource will appeal to academics and students in insurance law and regulation, policymakers and private practice lawyers. The book also aims to stretch the imagination of anyone with an interest in insurance law and regulation, providing detailed analysis and avenues for further investigation.
