Local Government and Strategic Choice J.K. Friend 2016-08-03 Local Government and Strategic Choice, Second Edition is the result of a study of policy-formation in the City Council of Coventry during a four-year period. This edition is a reappraisal of the earlier edition, with an emphasis on "connective planning." Part I describes the planning strategies made in an urban setting. This part explains the City and the City Council, organization of the local authority, decision-making mechanisms, developmental planning including land use, school system planning, and cross-departmental planning. Part II is a study of city planning as a process of strategic choice that has been altered in many different ways depending on the purpose. This part also discusses the problems encountered in the planning process such as the existence of organization boundaries in the government sector. Part III deals with a fictional case that relates the uncertainties and political realities of decision-making in an urban setting. The case studies cover land allocation and development, tax, and traffic issues. Part IV discusses organizational challenge and also touches in some way on the future organizational structure of local governments. This text then explains the need for "connective planning" of how individuals build flexible networks among decision-making agencies to serve the various interests of both the private and government sectors. This book is suitable for sociologists, city administrators and officials, local government officials, heads of government agencies, and heads of planning and engineering departments of local government units.

Sustainability Accounting and Accountability Delphine Gibassier 2014-06-05 The management and balancing of social, environmental and economic sustainability is one of the most complex and urgent challenges facing both private and public sector organizations today; with these challenges of sustainability posing many risks to, and many opportunities for, advancing the aims and performance of organizations. Accounting and accountability processes and practices provide key tools to help organizations to more effectively identify and manage the risks and opportunities of sustainability. Popular features from the first edition are retained, whilst recent developments in theory and practice are accounted for. New substantive chapters on water resource accounting, carbon accounting, and decision making have been introduced and the book continues to benefit from a host of expert contributors from around the world, including Jesse Dillard, Rob Gray, Craig Deegan. This comprehensive and authoritative textbook will continue to be a key resource for students of accounting and sustainability, as well as being a vital tool for researchers.

Local Government and Strategic Choice (Routledge Revivals) John Friend 2013-10-14

First published in 1969, this book is concerned with the processes of policy-making in local government. The authors address themselves to the basic challenge of planning in a democracy and consider issues such as how those elected to exercise choice on our behalf can preserve and expand their capacity to choose discriminatingly, when the sheer complexity of the issues facing them tends all the time to make them increasingly dependent on the skills and judgements of their professional advisers. This question is explored in relation to the many different, yet interdependent, aspects of the planning process which impinge on any local community – with particular reference to the planning of housing, transport, education, and shopping, of land use and local government finance. The book is the outcome of a four-year program of research during which a mixed team of operational research and social scientists was given a unique opportunity to observe the ways in which decisions were made and plans formulated in one particular city- Coventry. It covers both political and professional aspects of local government in 1960s Great Britain and has had important implications for urban governments throughout the world.

Integrated Science in Digital Age 2020 Tatiana Antipova 2020-05-26 This book presents the proceedings of the 2020 International Conference on Integrated Science in Digital Age, which was jointly supported by the Institute of Certified Specialists (Russia) and Springer, and was held on May 1–3, 2020. The conference provided an international forum for researchers and practitioners to present and discuss the latest innovations, trends, results, experiences and concerns in the various areas of integrated science in the digital age. The main goal of the conference was to efficiently disseminate original findings in the natural and social sciences, covering topics such as blockchain & cryptocurrency; computer law & security; digital accounting & auditing; digital business & finance; digital economics; digital education; digital engineering; machine learning; smart cities in the digital age; health policy & management; and information management.

Financial Accounting with International Financial Reporting Standards Jerry J. Weygandt 2018-07-18 While there is growing interest in IFRS within the US, interest outside the US has exploded. Weygandt's fourth edition of Financial Accounting: IFRS highlights the integration of more US GAAP rules, a desired feature as more foreign companies find the United States to be their largest market. The highly anticipated new edition retains each of the key features (e.g. TOC, writing style, pedagogy, robust EOC) on which users of Weygandt Financial have come to rely, while putting the focus on international companies/examples, discussing financial accounting principles and procedures within the context of IFRS, and providing EOC exercises and problems that present students with foreign currency examples instead of solely U.S. dollars.

De Gruyter Handbook of Personal Finance John E. Grable 2022-03-07 The De Gruyter Handbook of Personal Finance provides a robust review of the core topics comprising personal finance, including the primary models, approaches, and methodologies being used to study particular topics that comprise the field of personal finance today. The contributors include many of the world's leading personal finance researchers, financial service professionals, thought leaders, and leading contemporary figures conducting research in this area whose work has shaped—and continues to affect—the way that personal finance is conceptualized and practiced. The first section of the handbook provides a broad introduction to the discipline of personal finance. The following two sections are organized around the core elements of personal finance research and practice: saving, investing, asset management, and financial security. The fourth section introduces future research, practice, and policy directions. The handbook concludes with a discussion on an educational and research agenda for the future. This handbook will be a core reference work for researchers, financial service practitioners, educators, and policymakers and an excellent supplementary source of readings for those teaching undergraduate and graduate-level courses in personal finance, financial planning, consumer studies, and household finance.
