**Identiteit en diversiteit** M.

Verkuyten 2010 Identiteit is een centraal onderwerp in debatten over sociale cohesie, culturele diversiteit, integratie en wij-zijdenken. Verkuyten bekijkt identiteiten, etnische relaties en manieren om met culturele diversiteit om te gaan vanuit onze kennis over menselijk gedrag: wat mensen willen, waar ze behoefte aan hebben, hoe ze in de regel reageren. Het gaat om de betekenis van gedragswetenschappelijke benaderingen in het duiden van hedendaagse dilemma's binnen onze pluriforme samenleving. Daarbij komen vragen aan de orde als: waarom en wanneer plaatsen mensen zichzelf en anderen in sociale categorieën en met welke gevolgen? Wat zijn de psychologische achtergronden van positieve/negatieve

relaties tussen groepen? Hoe ontstaan meervoudige identiteiten en hoe gaan we daarmee om? Hoe reageren mensen op stigmatisering en uitsluiting? Hoe kunnen we omgaan met etnisch-culturele diversiteit en groepstegenstellingen? Omdat de verwijzing naar cultuur(verschillen) niet specifiek genoeg is, neemt Verkuyten de maatschappelijke verhoudingen en posities in ogenschouw.

**History of Computing and Education 2 (HCE2)** John Impagliazzo 2006-07-27

These proceedings derive from an international conference on the history of computing and education. This conference is the second of hopefully a series of conferences that will take place within the International Federation for Information Processing (IFIP) and hence, we describe it as the "Second IFIP Conference on the History of Computing and Education" or simply "History of Computing and Education 2" (HCE2). This volume consists of a collection of articles presented at the HCE2 conference held in association with the IFIP 2006 World Computer Congress in Santiago, Chile. Articles range from a wide variety of educational and computing perspectives and represent activities

from five continents. The HCE2 conference represents a joint effort of the IFIP Working Group 9.7 on the History of Computing and the IFIP Technical Committee 3 on Education. The HCE2 conference brings to light a broad spectrum of issues. It illustrates topics in computing as they occurred in the "early days" of computing whose ramifications or overtones remain with us today. Indeed, many of the early challenges remain part of our educational tapestry; most likely, many will evolve into future challenges.

Therefore, these proceedings provide additional value to the reader as it will reflect in part the future development of computing and education to stimulate new ideas and models in educational development. These proceedings provide a spectrum of interesting articles spanning many topics of historical interest.
