Fieser and Fieser's Reagents for Organic Synthesis, Volume 2 Leffel, J., & Co 1967 This major reference work is arranged like an encyclopedia, with each entry providing information about a reagent which has been reported as useful in organic synthesis. Most of the reagents are themselves organic, but inorganic reagents are also included. Suppliers are listed for commercially available reagents; otherwise, a brief indication of the method of preparation is given, along with a literature reference. Concise information and literature references are also provided on the application of reagents. There are author and subject indexes, and a very useful index of reagents by type, so that this reference set can serve as a very convenient point of entry into the literature dealing with a general type of reaction, whether it be a "name" reaction (e.g., Baeyer-Villiger oxidation), a method of introducing a specific functional group (e.g., amination), etc.

Verslagen door emoties probeert Starr zichzelf te herpakken in een samenleving vol ongelijkheid. De armoedige buurt waarin ze woont geeft een groot contrast met de school waar ze elke dag naartoe gaat. Overleven in deze twee werelden wordt steeds lastiger en de waarheid spreken krijgt een hoge prijs.
