Social Change Christopher Chase-Dunn 2016-01-08 From the Stone Age to the Internet Age, this book tells the story of human sociocultural evolution. It describes the conditions under which hunter-gatherers, horticulturalists, agricultural states, and industrial capitalist societies formed, flourished, and declined. Drawing evidence from archaeology, ethnography, linguistics, historical documents, statistics, and survey research, the authors trace the growth of human societies and their complexity, and they probe the conflicts in hierarchies both within and among societies. They also explain the macro-micro links that connect cultural evolution and history with the development of the individual self, thinking processes, and perceptions. Key features of the text Designed for undergraduate and graduate social science classes on social change and globalization topics in sociology, world history, cultural geography, anthropology, and international studies. Describes the evolution of the modern capitalist world-system since the fourteenth century BCE, with coverage of the rise and fall of system leaders: the Dutch in the seventeenth century, the British in the nineteenth century, and the United States in the twentieth century. Provides a framework for analyzing patterns of social change. Includes numerous tables, figures, and illustrations throughout the text. Supplemented by framing part introductions, suggested readings at the end of each chapter, an end of text glossary, and a comprehensive bibliography. Offers a web-based auxiliary chapter on Indigenous North American World-Systems and a companion website with excel data sets and additional web links for students.

Oscar's Books Thomas Wright 2008 In a fresh and delightful look at the character of Oscar Wilde through the prism of the books he read from childhood to his final years in Paris, an unfamiliar Wilde emerges — one that is astonishingly revealing of his personality.

Smoothing a Critical Transition Xiaolong Hu 2020-04-20 This textbook equips students interested in becoming researchers with the essential nontechnical skills. After an introduction to graduate schools, it discusses preparing for research, reading and organizing literature, writing research articles and other documents, publishing papers, presenting research findings at conferences, collaboration with advisors and other researchers, patent applications, research ethics, and how to improve research by learning about the history of science. These nontechnical skills are just as important as technical ones in terms of becoming a successful graduate student, yet they have seldom been taught systematically in courses. Further, they can bridge the gap from the classroom to the lab, making one of the most critical transition periods—from student to researcher—smoother and more enjoyable. The book features a wealth of real-life examples and exercises, which readers can easily apply in their own research. Intended mainly for graduate and upper-undergraduate students just embarking on lab research, it can also be used as a textbook or reference guide for courses on research methodology and related topics.

Research in Rehabilitation Counseling James L. Bellini 2009 This second edition represents the thorough revision necessary to accurately reflect the variation and wealth of research methodologies used in contemporary rehabilitation counseling research. As with the previous edition, this new second edition is divided into ten chapters. Chapter 1 establishes the theoretical underpinnings of social scientific inquiry, provides a foundation in the philosophical, epistemological, and methodological considerations related to the design and execution of rehabilitation research, and discusses the broad purposes of research. Chapter 2 addresses the issues that.
