*Hands-on Manual for Cinematographers* David Samuelson 2014-03-26 The "Hands On" Manual for Cinematographers contains a wealth of information, theory, diagrams and tables on all aspects of cinematography. Widely recognised as the "Cinematographer's Bible" the book is organised in a unique manner for easy reference on location, and remains an essential component of the cameraman's box. Everything you need to know about cinematography can be found in this book - from camera choice, maintenance and threading diagrams; to electricity on location, equipment checklists, film stock, lenses, light and

colour. Of particular use will be the mathematics, formulae, look up tables and step by step examples used for everything from imperial/metric conversions to electricity, exposure, film length, running times, lights and optics. Sections on special effects and utilities are also included as well as a list of useful websites. David Samuelson is a well known and respected cameraman who has been instrumental in fostering award winning new technical innovations. He is a technical consultant, lecturer and author of three other leading publications for Focal Press: The Panaflex User's Manual 2ED, Motion Picture

Camera and Lighting Equipment and Motion  
Picture Camera Techniques.

*Television and Political Advertising* Frank Biocca  
2013-12-16 This volume represents one of the first major scholarly effort to unravel the psychological and symbolic processing of political advertising. Utilizing survey, experimental, qualitative, and semiotic methodologies to study this phenomenon, the contributors to *Television and Political Advertising* trace how political ads help to interpret the psychological reality of the presidential campaign in the minds of millions of voters. A product of the National Political Advertising Research Project, this interdisciplinary effort is valuable to researchers in advertising,

communication, and consumer psychology since it helps define future work on the relationship between television, politics, and the mind of the voter. This volume, *Television and Political Advertising: Psychological Processes*, is the first of two, and covers such topics as Models and Theories for Viewing Political Television; Psychological Processing of Issues, Images, and Form; Differential Processing of Positive and Negative Advertising; and The Psychological Contexts of Processing.

2000-09-14 Completely up-to-date coverage of water treatment facility design and operation This Second Edition of Susumu Kawamura's landmark

volume offers comprehensive coverage of water treatment facility design, from the basic principles to the latest innovations. It covers a broad spectrum of water treatment process designs in detail and offers clear guidelines on how to choose the unit, process, and equipment that will maximize overall efficiency and minimize maintenance costs. This book also explores many important operational issues that affect today's plant operators and facility designers. This new edition introduces several new subjects, including value engineering, watershed management, dissolved air flotation

process, filtered reservoir (clearwell) design, and electrical system design. It provides expanded and updated coverage of objectives for finished water quality, instrumentation and control, disinfection process, ozonation, disinfection by-product control, the GAC process, and the membrane filtration process. Other important features of this Second Edition include: \*

- \* Practical guidance on the design of every water treatment plant component
- \* New information on plant layout, cost estimation, sedimentation issues, and more
- \* English and SI units throughout
- \* Help in designing for compliance with water

treatment-related government regulations  
Supplemented with hundreds of illustrations,  
charts, and tables, *Integrated Design and  
Operation of Water Treatment Facilities*, Second  
Edition is an indispensable, hands-on resource for  
civil engineers and managers, whether working on  
new facilities or redesigning and rebuilding existing  
facilities.

*Chromecast Device User Guide* Joseph Joyner

2015-06-01 Since the internet speeds went above the 500kbps mark, the number of things people can do with their interconnected devices

skyrocketed. Automated homes, connected cars, and internet enabled TVs. The latter is what threatens to revolutionize the entertainment world as we know it, do away with cable TV and abolish the need for expensive blue-ray players. Even though smart TVs are so lucrative, most people find them either too costly, or limiting. The alternative would be going for a TV with an HDMI port, a USB port and purchasing a dongle to bring in the power of internet TV. Chromecast is one of the best and cheapest such tools in the market.
